DETAILED ACTION***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-22, and 25-46, drawn to a catalytic DNA molecule, a method of making said molecule and a method of using said molecule.

Group II, claim(s) 23, drawn to a composition comprising a population of two or more catalytic DNA molecules targeted to different sites on a substrate.

Group III, claim(s) 24, drawn to a composition comprising a population of two or more catalytic DNA molecules targeted to different substrates.

The subject matter claimed by claim 35 is unclear, as it recites a method which does not have antecedent basis. Claim 35 is dependent on claim 7 and has been grouped with Group I, which includes the claim which claim 35 is dependent upon.

Art Unit: 1635

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. An application is considered to have unity of invention if the claims are drawn to a product, a process specially adapted for the manufacture of the said product, and a process of use of the said product (see MPEP 1850, 37 CFR 1.475). In the instant application, multiple products have been claimed and, therefore, unity of invention is lacking. Group I is drawn to the first product, a catalytic DNA molecule targeted to a single site in a single substrate, and a method of manufacture and a process of use of said product. The product of Group I differs from the products of each of Groups II and III that the products of each of Groups II and III are drawn to a population of DNA molecules, which target multiple sites. The products of Group II and Group III differ from each other in that the product of Group II targets multiple sites within a single substrate, whereas the product of Group III targets multiple substrates.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

Art Unit: 1635

named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen A. Lacourciere whose telephone number is (703) 308-7523.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John LeGuyader can be reached at (703) 308-0447. The fax phone number for this Group is (703) 308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
